Subject: formaldehyde text section
Attachments: Formaldehyde_Asthmalmmune_15Mar2013_JF.docx

Hello Glinda,

I've read over the attached formaldehyde section- sorry it took a few days to get back to you!

There were one or two spots where I couldn't quite follow the discussion- although it's entirely possible that there were no conclusions made or common themes identified, which is what I was looking for.

I Didn't look too hard at the evidence tables, although there was one comment on that study of Japanese medical students (regarding the 1 with a positive IgE test).

Aside from some other comments I made, which you can take or leave entirely as you like, it was easy to read and generally made sense.

Hope that something therein is helpful, and let me know if there's anything I need to clarify!

Thanks,

Jason
